**DETAILED ACTION*****Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raaijmakers in view of Kim, both of record, and Lee et al (2004/0238872). Applicants have amended the claims to add that the second capacitor electrode and the first and second dielectric layers have a planar configuration. While Raaijmakers and Kim teach the basic structure of the invention, for the reasons given in the previous action, the reference to Lee is added to show the well known and obvious feature of using planar layers for the capacitor structure.

See, for example, the FIG. 3 embodiment of Lee which shows two dielectric layers and the capacitor electrodes, formed in a planar configuration, as claimed. In addition, Lee teaches the use of aluminum oxide and hafnium oxide dielectric layers, as claimed.

One skilled in the art would be motivated to combine these references in order to simplify the fabrication process by using a planar orientation to form the capacitors.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
